Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5,10-14, 19,20 are rejected under 35 U.S.C. 102(e) as being anticipated by Landry et al. (2004/0147928).

With respect to claims 1, 10, Landry et al disclose a device for guiding an implant to a location adjacent a bone anchor comprising: a guide member (100) including a connecting portion (104) and a guiding portion (102), wherein with the connecting portion adjacent the bone anchor said guiding portion extends proximally from the connecting portion and is adapted to receive the implant wherein the guiding portion is flexible and positionable between an untaut configuration and a taut configuration as the implant is guided therealong, the connecting portion includes a body comprising a tapered portion forming a substantially uniform transition between the anchor and the guiding portion; as set forth in page 3, para [0051-0057], page 4, para [0063], para [0070], page 7, para [0100-0101], page 9, para [0112-0115] and as set forth in the claims ; and as best seen in FIGS.1-27.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-9,15-18,68-79 are rejected under 35 U.S.C. 103(a) as being unpatentable over Landry et al. (2004/0147928) in view of Branch et al. (6,610,065).

With respect to the above claims, it is noted that Landry et al discloses all the limitations, except for a connecting portion including a pair of extensions to releasably engage with the bone anchor; as claimed by applicant. However, in a similar art, Branch et al, FIG.11, evidence the use of an insertion instrument with a pair of extension to releasably fasten and secure an implant.

Therefore, given the teaching of Branch et al, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Landry et al, as taught by Branch et al to releasably fasten and secure an anchor.

Allowable Subject Matter

The indicated allowability of claims 1-20 is withdrawn in view of the newly discovered reference(s) to Landry/Branch et al. Rejections based on the newly cited reference(s) follow. (see above).

Response to Amendment

Applicant's arguments, see Remarks, filed 3/9/07, with respect to the rejection(s) of claim(s) 68-79 under 103 have been fully considered and are persuasive. Therefore,

Art Unit: 3733

the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Landry/Branch et al.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
